

AN OCCASIONAL NEWSLETTER

from the desk of Joy Metcalfe

Holiday Greetings to you all!

Well here we are again, on the cusp of a New Year. 2007 has been quite a year for many of us—a year of great possibilities for change and transformation. To me, the defining event of 2007 was when Pluto, after moving into Sidereal Sagittarius in 2006 for the first time in recorded history, aligned with the core of the Galaxy on 3 separate occasions. This alignment created the opportunity for all of us to recognize, resolve and release our limiting dualistic beliefs so that we can more fully accept the new energy pulsations/donations of Oneness consciousness we will receive when our planet aligns directly with the core of the Universe (actually as I write this, we have yet to experience the third alignment which will occur on Dec. 20, 2007—more on that later).

Sagittarius is the principal constellation and sign on the Galactic Equator, which is the heart center of our Galaxy. The reason that having Pluto enter the celestial position of sidereal Sagittarius is so significant is because it signals the fact that our solar system has entered the place in space, that acts as a star gate or portal to the Galactic Center—an event that happens only every 26,000 years! Whatever lies at the center of the Galaxy, it is in some way the motivating force behind the Galaxy, it is the core and the heart of the Galaxy, and the impulses that flow out from it physically, energetically and at the subtle-energy levels are thought by many of esoteric beliefs to carry within them the impulses of the First Ray of Manifestation, the Ray of Power or Divine Will.

The effects on our Solar System by such a close association with the Galactic Center have begun to be intently studied by scientists. In 1994 a group of scientists published a book based on a study of the new states and activity regimes of the Sun and put forth the belief (among others) that the emanations from space can have a radical effect on our consciousness levels. Alexey Dmitriev of The Russian National Academy of Science in Akademgorodok near Novosibirsk, Siberia and colleagues used evidence collected by the Voyager satellites and compared it with research compiled in Russian and Western scientific journals, and information from NASA and the ESA (European Space Agency). Based on this compilation of information, Dmitriev claims that our solar system is transforming as we enter a new place in space and receive energetic

impulses from the center of the Galaxy. “The Heliosphere [solar system] transition through this structure has led to an increase of the shock wave in front of the Solar System from 3 to 4 AU, to 40 AU, or more (each AU is the length of the space between the earth and the sun). This shock wave thickening has caused the formation of a collusive plasma in a parietal layer, which has led to a plasma overdraft around the Solar System, and then to its breakthrough into interplanetary domains [5,6]. This breakthrough constitutes a kind of matter and energy donation made by interplanetary space to our Solar System.” Dmitriev even went as far as to say that he believed it would cause “the spontaneous mass evolution of Humanity as we now know it”.

Our solar system is moving ever closer to the core of our Universe or Milky Way and on June 20, 2008 our sun will enter the celestial position called “The Gate of Man” causing Earth to move into direct alignment with “The Gate of God”—the portal to the core of the Universe. At this momentous time our planet will begin experiencing the energetic impulses from the core of the Galaxy landing directly upon us and attuning us to the higher frequencies of light consciousness—“the spontaneous mass evolution of Humanity as we now know it” will begin in earnest!

I am coining this alignment on June 20, 2008 an Event Horizon—a quantum mechanics term usually used in the context of a black hole. The general definition of an Event Horizon however is the point of no return on the way to an event, it posits that at a certain point, a line is crossed and there is no possibility of turning back. In psychic terms we could call it entering the events’ Auric Field. That is what I believe our planet will be doing when it aligns with the core of the Universe on June 20, 2008—this very summer! We will be entering the Auric field of the new dimension in time/space consciousness that our solar system is headed towards. This means that we, as a planet and solar system, will begin directly receiving the impulses of light/energy from the core of the galaxy for the first time in recorded history. Laurie Grant and I and other Master Workers of The Light will be offering a workshop and ceremony on the island of Maui on that date to support our best alignment with this transformative event please see back page if you are interested in joining us.

We are being prepared for this time of trans-

formation/evolution by first receiving the energies of Pluto—the planet of transformation—emblazoned upon our planet as it aligns with the core of the Universe and receives its pulsations of light. How we are able to receive these light pulsations are key to how we will experience our transition into the light. This year has been an opportunity to see where and how we are still resisting Universal/Divine Will, and ultimately, to come to realize that Resistance Is Futile! On Dec. 20, 2007 Pluto will align with the core of the Universe for the last time, while conjunct the Earth, the Sun, Jupiter, and Mercury. This is yet another opportunity to use the energies of the times to facilitate an inner clarity of thought and action and to begin to position ourselves for the exciting ride into our new dimension in time that will occur on Dec. 20, 2012. Please see back page if you are interested in joining me for the last in my Gate of God series supporting this event, which will be on Dec. 15th.

So now we know that our solar system and planet are aligning with the core of the Milky Way and will be receiving it’s transformative emanations of light/consciousness and that we will be entering the Event Horizon of this alignment on June 20, 2008. This is all in preparation of course, for the big event of Dec. 21, 2012 as it is at that time that our solar system will be its closest to the core of the Universe. The alignment of the winter solstice sun with the Milky Way in 2012 is believed to mark the beginning of a new precessional cycle in humanity’s spiritual and cultural work. It occurs when the winter solstice sun conjuncts the crossing point of The Milky Way and the ecliptic in Sagittarius. This crossing point is where the “dark rift” in the Milky Way is. The dark rift was known to the ancient Maya as Xibalba be (the Road to the Underworld) or simply “the Black Road.” At 11:11AM GMT on the winter solstice of 2012, the sun will be right in this dark rift. The orientation is such that the Milky Way rims the horizon at all points around our solar system. The Milky Way will “sit” on the earth, touching it at all points around and opening up the cosmic sky portal while the galactic and solar planes are in alignment. This cosmic event will occur each winter solstice for approximately 36 years and then not occur again for 26,000 years.

And that, my friends, is what the big excitement about 2012 is all about. Our planet will be entering the dark rift of the Milky Way and receiving from all sides it’s pulsations of light/consciousness. So you can see why our scientists are beginning to be curious about what the consequences of this occurrence might be. The question is what effect will these light pulsations have upon us—indeed, what is this energy comprised of? If these pulsations are aspects of the motivating force behind the Galaxy, what will we discover/learn/become from this attunement into light? I will leave you with the thoughts of a favorite master of mine...

Scientists tell us that, without the presence of the cohesive force amongst the atoms that comprise this globe of ours, it would crumble to pieces and we would cease to exist; and even as there is cohesive force in blind matter, so must there be in all things animate, and the name for that cohesive force among animate beings is love. We notice it between father and son, between brother and sister, friend and friend. But we have to learn to use that force among all that lives, and in the use of it consists our knowledge of God. Where there is love there is life; hatred leads to destruction...

The last... Aligning with the Gate of God

Dec 15th, 2007; A workshop in Sebastopol 10am- 5pm

On Dec. 20, 2007 Pluto will align with the core of the Universe for the last time, while conjunct the Sun, Jupiter, the Earth, and Mercury. As it does it will act as a magnifying glass sending the energy/pulsations of light from the core of the Universe directly onto our planet thru its lens of transformation of matter/consciousness. This is yet another opportunity to begin to best position ourselves for the exciting ride into our new dimension in time that occurs on Dec. 20, 2012.

Prepare for this transformative time!

Learn the following tools and information: A meditation to begin the activation of Oneness Consciousness—your highest consciousness, how these celestial occurrences are affecting you and the planet and what to do about it, the power of manifesting from the frequency of Unconditional Love, how to recognize, resolve and release our resistances to Divine Will/Consciousness, and much more.

My friends, 2008 begins a very special time in the history of our planet and solar system. I believe that each and every one of us has chosen to incarnate at this specific time to make the most of the incredible opportunities for soul growth now becoming available to us. My New Year's wish for all of you is that this year will mark the time when you began to truly live your life within the light of Divine Oneness consciousness.
